

Explore the depths of human thought, emotion, and behavior with a course that brings the science of psychology to life—powered by the latest research and uniquely taught using advanced technology to elevate the learning experience.

## Student-Centered Design

At the heart of psychology is the story of what makes us human—how we think, feel, and interact with the world. Developed by higher-ed psychology educators, this Introduction to Psychology curriculum is part of our Community College (CC-OLI) series, created through the Community College Open Learning Initiative. While designed specifically to meet the needs of introductory psychology students at community colleges, the course has been successfully used by learners and educators at a broad array of institutions. Through interactive lessons, videos, and self-assessments, students engage with the most current material, while real-time feedback helps them connect abstract theories to real-life experiences, turning complex concepts into meaningful discoveries about the human experience.

### Core Components

-  16 Units Covering 60 Modules
-  \$35 per Student
-  Student-Centered Learning Objectives
-  Interactive Activities and Immediate Feedback
-  Scored Assessments to Measure Mastery

### Proven Learning Approach

Students engage with the material through a combination of multimedia, including videos, animations, and simulations, all delivered in one of the most advanced virtual learning environments. Each unit is crafted to make complex psychological concepts engaging and relatable. Whether exploring brain functions or analyzing social behavior, students experience the content as an active, hands-on exploration of the mind and human interaction.

## Adaptive Learning Experience

No two minds work the same, and this course recognizes that diversity. Powered by adaptive technology, it provides feedback and insights for each student's interactions, ensuring everyone remains engaged and supported as they explore psychology's complexities together.

# Learning Dashboard for Educators

**Open Learning Initiative**  
Transforming higher education through the science of learning.

This powerful dashboard acts as a compass, tracking each student's progress through every learning objective, activity, and assessment. With real-time insights into performance, educators can adapt their teaching strategies and provide targeted support precisely when it's needed. It offers a clear view of class progress, empowering educators to navigate the learning experience effectively and ensuring that every student is guided and supported.

**Designed by  
Educators,  
for Educators**

Part of the Community College (CC-OLI) series, this program is designed by fellow educators who understand what works in the classroom, leveraging cutting-edge technology to illuminate complex psychology topics and encourage student engagement in meaningful ways.
